

# SAP S/4HANA

## Migration with focus on the essentials

### In a Nutshell: SAP S/4HANA

The current market situation creates pressure on companies in all industries. Comprehensive, rapid and evidence-based decisions are more important than ever.

The **S/4HANA** platform, an **ERP system of the latest generation**, makes your SAP system ready for the challenges that your ERP system landscape is facing. The new platform is of **performing power, intuitive** and offers a variety of **options for scaling and acts as a basis for innovations** within the company.

We accompany you on your way to the implementation of S/4HANA!

---

### ERP system landscape - the red rag

The SAP ERP system is already in use at many companies. Over the years, the initially lean processes have increased: Special solutions were developed, media breaks were tolerated for performance reasons, and many technical innovations from SAP could not be realized due to a lack of "upgrade flexibility" of the special solutions.

The result: A **rigid ERP** system that makes a re-design a Herculean task.

---

### SAP-Migration, but leaner?

SAP ERP implementations are cost-intensive and complex projects with impact and burden on the entire company. Even preliminary studies and proof-of-concept projects can cause great efforts.

Our answer: We migrate your SAP system in a lean approach focusing on the essentials.

In a prototype-like approach (MVP), we convert your previous SAP ERP to the latest S/4HANA platform. You can use the system to discover the available SAP innovations with the data you are familiar with from your SAP system.

# SAP S/4HANA

## Migration with focus on the essentials

### Our Promise

CONVOTIS experts perform a conversion of your existing SAP ERP system. Your benefits:

- **Inventory analysis:** Information about the technical requirements for migrating your system (you know what is missing to be able to do it on a large scale).
- **Look & Feel:** You will experience how the implementation "feels". This applies to the database as well as the new SAP Fiori user interface.
- **Familiar environment:** The update happens with your organizational units and processes. This saves you from demo systems with incomplete data.

---

### An Outlook

S/4HANA as a digital core brings **transparency and agility to business processes** - enhanced by the use of additional applications. By switching to this technology early on, companies will continuously benefit from the updates and innovations provided by SAP.

In the coming years, cloud services will also affect the area of ERP systems and will lead to an **acceleration of innovation cycles**.

**Automation and artificial intelligence** will lead to a **rapid increase in productivity for companies**, especially in the area of these systems.

The **CONVOTIS** team of experts are happy to assist you with the integration and support of the S/4HANA platform in your SAP system.
